	recognise that environments can change and that this can sometimes pose dangers to living things			X			
States of Matter	compare and group materials together, according to whether they are solids, liquids or gases		X				X
	observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)		X				X
	identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature		X				
Sound	identify how sounds are made, associating some of them with something vibrating						
	recognise that vibrations from sounds travel through a medium to the ear						
	find patterns between the pitch of a sound and features of the object that produced it						
	find patterns between the volume of a sound and the strength of the vibrations that produced it						
	recognise that sounds get fainter as the distance from the sound source increases						
Electricity	identify common appliances that run on electricity	X					
	construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers	X					
	identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery	X					
	recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit	X					
	recognise some common conductors and insulators, and associate metals with being good conductors	X
